Faisal Kamran
PhD, Eindhoven University of Technology (TU/e), The Netherlands

- Faisal is an assistant professor of Computer Science at Information Technology University (ITU) of The Punjab.

- He has **5 years of experience in academia and 2 years of administration experience** in the civil services of Pakistan.

- He received his **PhD degree from Eindhoven University of Technology, The Netherlands in 2011** (**ranked 61 by THE in technology**). It is worth to emphasize that only 7% doctoral candidates finish their Ph.D. degrees within allocated time of four years in The Netherlands, and Faisal is honored to be among those students since he completed his degree well ahead of the allocated time.

- He is doing research in the well-established area of data mining. In his brief research career, he has already published **over 20-refereed papers** in various prestigious journals and conferences. His current research interests include constraint based classification, big data and business intelligence, bias-aware data mining, recommender systems, privacy preserving data mining and data mining for good governance.

- According to Google scholar, Dr. Faisal Kamran's **H-index is 7** and his research work has more than **132 citations**. He has an honor that his PhD research work (discrimination-aware data mining) received warm welcoming response from the international data mining research community, e.g., the research groups from Microsoft USA, Harvard University, University of Toronto, Kyoto University and University of Pisa are continuing their research over his doctoral research topic.
